

Perox³⁹⁵

Chlorine Free Pool & Spa Sanitiser

Perox 395, a chlorine free pool and spa sanitiser uses hydrogen peroxide. H_2O_2 is a powerful yet versatile oxidant that is both safe and effective

The Natural Choice

Water and oxygen; two elements we couldn't live without. Together they create one of the most powerful sanitisers on the planet.

Perox (H₂O₂) is a formulated blend of hydrogen peroxide which is simply water with an extra oxygen molecule that has been developed to work in unison with the Hydroxypure system to ensure perfectly sanitised water at all times.

Hydrogen Peroxide is formed in nature to control bacteria that grows all around us. For example, during a lightning storm, hydrogen peroxide is created to combine with rain and naturally cleanse the environment.

For many years, hydrogen peroxide has been widely used in health treatments, from mouthwashes to antiseptic cleaner and anti-fungal treatments. In fact, health practitioners all over the world regard Hydrogen Peroxide Therapy as one of the greatest.

Water and oxygen are necessary elements for the existence of human life. Therefore it seems only natural to use hydrogen peroxide to keep your swimming pool and spa naturally clean.

Customer Testimonial

“ We like how it's salt free, odourless, free of taste and you don't have to shower after swimming. Also being chlorine free, our swimming costumes don't deteriorate and the water feels beautiful on our skin. There's no red eyes and no horrible chlorine smell and feel after swimming. ”

- Jacqui Royal, Sydney
