ATV REMOTE CONTROLLED ROBOTIC POOL CLEANER

THE NEXT GENERATION

The next generation Admiral ATV-NAV Robotic Pool Cleaner is an energy efficient, fully automatic submersible 'robot'. Ease of use is key – it requires no installation, no hoses and no additional equipment.

The Admiral ATV-NAV has 3 self-driven internal motors - one of which enables it to vacuum up water, dirt and debris through a built-in pump and then filter it through an internal filtration system; plus dual direct drive motors that drive two powerful scrubbing brushes and propel the Admiral ATV-NAV around the pool.

Additionally, Admiral's robotic technology allows for the automatic and systematic cleaning of the swimming pool without relying on the operation of the pool's filtration equipment.

Plus the power of its pump combined with the strategic location of its large intake ports allows debris to be vacuumed not only from under the cleaner, but also from its sides. It means the Admiral ATV-NAV cleans a wider path than almost every other robotic pool cleaner on the market.

RELEASE YOUR POOL SKIMMER

Without a suction cleaner attached to your pool skimmer, the Admiral ATV-NAV is left free to skim the top of your pool. Removing restrictions on your pool skimmer also increases the pool's turnover rate, thus improving water clarity.

Unlike traditional suction cleaners, the Admiral ATV-NAV has no problem vacuuming up large leaves and sticks. This results in a more comprehensive clean in a shorter period of time.

The Admiral ATV-NAV features a convenient & easy to use wireless hand held remote control that is perfect for spot cleaning and maneuvering the cleaner to high debris built-up areas.

A versatile cleaner, the Admiral ATV-NAV is equipped with five drive-wheels, which significantly increases the cleaner's drive traction, and a floating swivel on the power cord, enabling 360° rotation and preventing cord tangling. Admiral ATV-NAV is perfect for all types of residential pools measuring up to 9m x 12m, and including vinyl lined, fibreglass, tile and concrete.

SAVE TIME, WATER AND CHEMICALS

Admiral ATV-NAV micro filters and circulates the pool water, thus reducing filter maintenance plus saving water and pool chemicals.

ENERGY SAVING

Admiral ATV-NAV's water-cooled pump motor represents the latest in green technology. It operates on only 120 watts of power.

SCRUBS THE POOL FLOOR, WALLS & STEPS

Admiral ATV-NAV not only cleans your pool's floor, it also climbs and scrubs your pool's steps and walls up to the water line.

WIDE CLEANING PATH

The strategic location of the Admiral ATV-NAV's vacuum intake ports and the advanced geometry of its under-belly allow debris to be vacuumed not only from under the cleaner, but also from its sides.

LARGE INTAKE PORTS

Admiral ATV-NAV's extra large vacuum intake ports are placed directly behind both of its cleaning brushes, enabling the vacuuming of large leaves and debris.

ADMIRAL

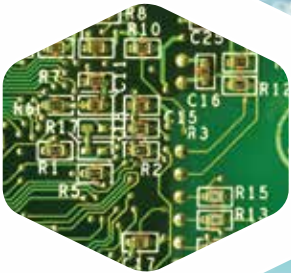

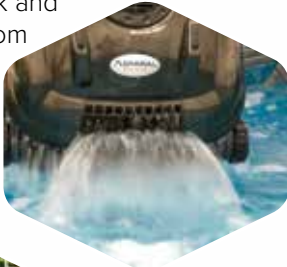

ATV-NAV

The Admiral ATV-NAV is equipped with a floating swivel on the power cord that enables 360° rotation, preventing cord tangling.

QUICKDRAIN FOR EASY LIFTING

Admiral ATV-NAV's quick-drain system allows water to rapidly flow back into the pool, immediately lightening the cleaner for quick and easy removal from the pool.

INTELLIGENT NAVIGATION

Admiral ATV-NAV's navigation system prevents the cleaner from getting caught on any obstacles. Plus its intelligent programming sends the cleaner in a different direction every time, improving pool coverage.

REMOTE CONTROL

The Admiral ATV-NAV features a convenient & easy to use wireless hand held remote control that is perfect for spot cleaning and manoeuvring the cleaner to high debris built-up areas.

EXTRA LARGE FILTER BAG

Admiral ATV-NAV's filter bag is designed to maximise its capacity and micro filters down to the finest debris.

DUAL DIRECT DRIVE MOTORS

Admiral ATV-NAV's front and rear Gel-pro brushes are both powered by the cleaner's direct drive motors, with increased torque and efficiency. Its Dual Direct Drive motors allow for powerful scrubbing, pin point navigation, better traction and superior climbing capabilities.

ALL TERRAIN TRACTION PLUS GELPRO BRUSHES

Admiral ATV-NAV has two sets of continuous traction wheels to enhance its climbing performance. Its dual Gel-pro brushes are gentle enough for vinyl liners, yet rugged enough to clean the dirtiest concrete and fibreglass pools.

TECHNICAL SPECIFICATIONS

Maximum pool size	9m x 12m x 2.4m depth
Pool types	In ground pools
Pool shapes	All shapes
Motors	2 x drive motors + 1 x pump motor
Automatic shut off	3 hours
Cable	18m power cord with floating swivel
Weight	4.5kg w/out transformer
Submerged weight	20kg
Filter volume	8.1 litres

2 YEAR WARRANTY

Admiral ATV-NAV Robotic Pool Cleaners are covered by a 2 year warranty. Admiral wheels and Gel-pro brushes are excluded from the warranty.

Caddy included for convenient storage and transport.

ELECTRICAL SPECIFICATIONS

Volts	24 volts DC
Watts	120 watts
Amps	5.22amps

DIMENSIONS

Length	420mm
Width	420mm
Height	240mm
