Waterco provides commercial filters for FINA-certified pool

To qualify as a FINA (Federation Internationale de Natation) certified swimming pool, it must provide the best possible environment for competitive use and training. Stringent regulations have to be met, and impeccable standards must be maintained.

For Queensland's prestigious Sunshine Coast Grammar (SCG), constructing a 50m FINA-compliant pool would create a world-class aquatic centre for students and a facility fit for international sportspeople. Combine that with a new learn-to-swim indoor pool and you have the perfect combination to create a pathway from junior swimmer to professional athlete.

“ Installing Waterco's commercial filters provide enormous peace of mind, they're not only durable, reliable and efficient but are easy to maintain for facility managers. ”

says Gerrie Baldwin from Baldwin Aquatic.

WATERCO
water, the liquid of life

Waterco Limited (ASX:WAT) pioneers reliable solutions for healthy, safe water environments, which are used in residential, commercial and industrial applications in over 40 countries. Established in 1981, it has become a global brand recognised for designing and manufacturing filtration and sanitisation equipment for the aquatic, aquaculture, and water treatment sectors.

World-class aquatic facilities reply on Waterco

To satisfy global guidelines and be eligible to host aquatic meets, the short course competition pool was required to maintain impeccable water quality year-round – especially with high bather loads.

“We needed to provide a cost-effective filtration system that could ensure the highest of water quality,” says Gerrie Baldwin from Baldwin Aquatic. Specialists in commercial swimming pool construction, filtration & maintenance, the family-owned company is the preferred choice for reputable institutions including St Andrew’s Anglican College, Bond University and the University of the Sunshine Coast.

To ensure consistently clean and hygienic water for students, coaches and competitors, Baldwin Aquatic installed Waterco’s high-performance Commercial Sand Filters – 3 x MD5500 models in the 50m Pool 2 x S1200 models in the indoor, learn to swim pool.

“Elite institutions like SCG have reputations to uphold, so installing Waterco’s commercial filters provide enormous peace of mind,” says Gerrie. “They’re not only durable, reliable and efficient but are easy to maintain for facility managers.”

World class sporting facilities

Less than a year after opening, Sunshine Coast Grammar’s 50m pool was an official training base prior to the 2018 Commonwealth Games.

Furthermore, it has not experienced any downtime.
